TurnAround

Designed for a variety of postures

The wrap-around backrest with generous upholstery provides comfortable support in any position.

Discover optimum lumbar support

The seat shell moves with you, tilting backward and forward.

The sloping, all-round front edge of the seat makes it easier to stand-sit/perch and change positions.

Adjustments

Height (chair + stool)

Pull the lever up and lift your body slightly to raise, or stay seated to lower. Releasing the lever at the desired height will lock the position.

Foot ring (stool)

Turn counterclockwise to loosen knob. Move up or down and turn knob clockwise until tight to secure foot ring in to place.

Braking casters prevent the stool version from being pushed forward. Simply grab the lower backrest and pull backwards.
