

Arrivals Table Collection

Tables to support work, wherever it happens.

Our new Arrivals table collection includes standing height, meeting and occasional tables, suitable for use across the entire office landscape. The unique plywood edge banding option offers a raw and organic feel that coordinates beautifully with the newly designed angled legs. The collection has been designed to complement our Arrivals Wing and Bench collections, creating a consistent aesthetic across any workspace. Our cable management delivers power discretely through a sleek pop-up module on the surface or a mini-tap unit that sits just below the table edge.

- New rounded angled table legs in solid clear oak or black finish
- Four new laminate options available
- Laminate edge detailing in plywood or coordinating color
- Tables featuring Nuform in custom shapes and sizes are also available
