Conditions of sale

Refer to the [Conditions of Sale](#) document on inscapesolutions.com.

Functional shelf

Widths: 30, 45, 60, 72, 75, 78, 84, 90, 96"

Depth: 15 3/4"

Open box as a shelf

Height: 15 3/4"

Widths: 12, 15, 18, 24, 30"

Depth: 15 3/4"

Open box for power entry

Height: 15 3/4"

Widths: 12, 15, 18, 24, 30"

Depth: 15 3/4"

Box with 2 drawers

Height: 15 3/4"

Widths: 15, 18, 24, 30"

Depth: 15 3/4"

Box for filing

Height: 15 3/4"

Widths: 15, 18, 24, 30"

Depth: 15 3/4"

Screen on-top

Height: 18"

Widths: 30, 45, 60, 72, 75, 78"

Screen insert

Height: 15 3/4"

Widths: 12, 15, 18, 24, 30"

2-layer cushion top

Widths: 15, 30"

Depths: 15 3/4"

Laminate

Laminate is bonded to particleboard; ½” thick for boxes, ¾” thick for fronts and 1” thick for functional shelves.

Laminate can be applied to the following Domain items:

- Boxes*
- Fronts
- Functional shelves*
- Top Screens (premium laminate only)

Laminate (LPL)

Colorways	Product code
Nova White	MCC001
Nova Black	MCC002
Bryan Maple	MCC003
Stainless	MCC006

*Boxes and functional shelves are only available in Nova White and Nova Black.

Premium laminate

Colorways	Product code
Ocean	MCC100
Island	MCC101
Orange Grove	MCC102
Pepper Dust	MCC103

Glass

Glass is ¼” in thickness. The frosted acrylic is frosted on one side. The bronze acrylic is throughout. The branch and dots acrylics are clear with painted patterned on one side.

Glass can be applied to the following Domain items:

- Top Screens
- Screen Inserts

Colorways	Product code
Clear	CL
Grey	GLG
Etched 1	ETC1
Etched 2	ETC2

Felt

Felt is 5mm thick. The cushions are constructed of two layers of felt with a foam center.

Felt can be applied to the following Domain items:

- Cushions

Colorways	Product code
Lagune	FLT01
Kiwi	FLT02
Taubengrau	FLT04
Anthrazite	FLT05

Worksurface laminate

Laminate is bonded to 1.25” thick particleboard. The underside of the surface is finished with a wood-fiber veneer backer. Worksurfaces include a 2mm edge banding in a coordinating color. Standard laminate tops do not have optional pencil groove.

Standard laminate can be applied to the following Domain items:

- Rectangular worksurfaces
- Curved end worksurfaces
- Square round worksurfaces

LCC-18 is available but is reserved for existing customers due to its different edge banding.

Worksurface nuforms

Nuform is a themofoil sheet that is continuously bonded to an MDF substrate. The sheet is surface-coated with a scratch resistant film. The underside of the surface is finished with low-pressure melamine. Nuform worksurfaces have optional pencil groove. No edge banding is required with Nuform because of its unique design, which wraps the foil to the underside of the worksurface.

Nuform solid or woodgrain can be applied to the following Domain items:

- Rectangular worksurfaces
- Curved end worksurfaces
- Square round worksurfaces
- Trapezoid worksurfaces

Product description

Product family

The Domain storage-system program is a modular system consisting of:

- Functional shelves
- Boxes
- Accessories
- Worksurfaces
- Supports

With this simple modular system, many diverse and individual configurations can be created and adapted to changing circumstances and needs at any time. As a modular storage based system, Domain combines the functions of storage space, room zoning, electrical capability and the screening of workplaces.

Domain is:

- Multifunctional
- Individual
- Convertible
- Creative

Construction features

Material

Melamine board with particle board core

Material thicknesses:

- Functional shelf 1"
- Carcass boxes ½"
- Front ¾"

Connection technology

The Domain modules consist of individual combinations of the functional shelves, boxes, worksurfaces and accessories.

The functional shelf has a centrally placed rail made of anodized aluminum. The function rail is used to fix the boxes, accessories and plinth elements in place.

The boxes are equipped with specially developed centered connection fittings.

The 12", 15", 18" wide boxes have 2 connection fittings: 1 x at the top, 1 x at the bottom.

The 24" and 30" wide boxes have 4 connection fittings: 2 x at the top, 2 x at the bottom.

The connection fitting consists of a guide sleeve and a clamping pin. The Domain key or a 6 mm Allen key is required to attach the boxes to the functional shelves. With a quarter turn, the box is attached to the function rails.

The boxes can be attached either facing front or facing back, as they are reversible. Depending on the arrangement and composition of the boxes, open compartments become a design element.

Positioning

For the positioning of the storage space modules the lowest functional shelf must be fitted with support feet. The appropriate set of support feet is chosen to match the width of the functional shelf. The steel support feet are fixed to the functional shelf and have tool-free adjustment modules to compensate for uneven floors.

DOMGP4

Set of four 1¾" diameter x ¾" high leveling glide plates. Glide plates are finished P331A Eco Black. These plates may be placed under Domain leveling glides to raise the height of the Domain configuration for leveling purposes. They may also be stacked on top of each other to achieve a greater height. The maximum number of glide plates that may be safely stacked is limited to 4 plates.

Linking

To create longer configurations the functional shelves can be linearly linked. For this a linking set must be chosen for each interface. The linking set consists of linking caps and slot nuts, which connect the functional shelves to be linked. Screen inserts cannot be used in places where there is a slot nut.

Basic rules for configurations

The following rules apply:

1. The height is limited to a maximum of 2 levels (4 functional shelves)

2. Open compartments must not be on the outside.

3. The maximum width of the open compartments is 30".

Product features

Box as a shelf element

The shelf element is available as a box in widths of 12", 15", 18", 24" and 30".

Box with 2 drawers

The box with drawers is available in widths of 15", 18", 24" and 30". The steel drawers in eco-black are equipped with full extension telescopic slides. The box also comes with a counterweight as standard that ensures stability. The functional load is limited as follows:

- Box 15" and 18" wide: 11lbs functional load.
- Box 24" and 36" wide: 22lbs functional load.

The drawers have a continuous handle strip made of anodized aluminum. The boxes are optionally available with a lock. Only the top drawer is lockable on box units with 2 drawers.

Box for filing

Pullout drawers and shelves are standard with one pair hangfile bars for side-to-side suspended filing. Optional accessories available. The element also comes with a counterweight that ensures stability. The functional load per drawer is limited as follows:

- File 15" and 18" wide: 22lbs functional load.
- File 24" and 30" wide: 44 lbs functional load.

The front has a continuous handle strip made of anodized aluminum. The elements are optionally available with a lock.

Accessories

Glass Screen on-top

Screens are available for placement on the top functional shelf. The glass screens are attached by means of an aluminum mounting clamp inserted into the functional rail.

The mounting clamps are fixed in the functional rail by a mechanical connection. The aluminum mounting clamps are included in delivery as standard.

Glass Screen Insert

Glass screens in widths of 12", 15", 18", 24" and 30" are available for use in the open compartments. The inserts are mounted between the functional rails. Plastic profiles inserted in the functional rails at the top and bottom. The plastic profiles are included in delivery as standard. In addition to clear screens, translucent glass screens with applications as decorative inserts are available to choose from in the following designs:

- Clear
- Etch 1 Side
- Etch 2 Sides
- Grey (Smoked)

Screen inserts cannot be used in places where there is a slot nut.

Cushion Top

The cushion tops consist of 2 layers of 5 mm thick felt and a foam filling. The lower layer in Graphite Grey has a non-slip coating.

Functional Shelf & Hardware

How to order

1. Specify product number.
2. Specify finish.

Product code key example

DOMFS-72

General information

- Power Modules are available in only white.
- The circuit 3 receptacle requires 2+2 or 3+1 wire designation (“U” in the code signifies 3+1 wire configuration compatible)
- Jumper cables do not connect together. H connector blocks need to be specified at each connection point.
- See installation guide for details.
- Electrical module rail kit should match the length of shelf. Module cut outs are fixed 15” from each end of the rail kit. Only comes in P290 Aluminum Leaf finish
- When ordering DOMEMREC, specify finish to match boxes & shelves.
